DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Burns (US 5,942,009).

Burns (US' 009) teaches a method for the same-day permanent waving and coloring of hair comprising the steps of contacting the hair with a pre-wrap solution, and placing on rods if the hair is to be cured, the hair is processed using a waving agent, the excess is preferably removed, contacting the hair with a coloring composition containing an oxidizing colorant to develop color and rebond the hair (see abstract) and further, contacting the hair with additional oxidizing agent (neutralizing agent) and optionally shampooing the hair (see col. 5, lines 20-22). Burns also teaches the steps of drying the hair while at least some of the first composition and/or optional second composition is still in contact with the hair so that substantially all of the hair is dry (see col. 5, lines 12-15).

The claims differ from the reference by reciting a method for coloring portions of the hair while at the same sitting waving other portions of the hair.

However, the reference of Burns teaches a method for permanent waving and coloring of hair with less time and without damage to the hair (see col. 8, lines 27-53).

Art Unit: 1751

Therefore, it would have been obvious to one having an ordinary skill in the art at the time of the invention to apply the claimed method for waving specific portions of hair while coloring other portions of hair with a reasonable expectation of success because the reference teaches similar method for waving and dyeing hair in less than three hours wherein the method impacts improved shape retention, color receptivity, color stability, color retention, shine, strength, and/or color evenness to hair and that the hair also has a more lustrous appearance and the method further, resulted in saving time and money (see col. 8, lines 27-35), and, thus, the person of the ordinary skill in the art would expect such a method to have similar properties and results to those claimed, absent, unexpected results.

Conclusion

3 The remaining references listed on form 1449 have been reviewed by the examiner and are considered to be cumulative to or less material than the prior art references relied upon in the rejection above.
